

Sankore-3.1/src/core
/UBApplicationController.h

```
graph TD; A[Sankore-3.1/src/core /UBApplicationController.h] --> B[QtGui]; A --> C[QFtp];
```

The diagram illustrates a class hierarchy. At the top, a gray rectangular box contains the text 'Sankore-3.1/src/core' followed by '/UBApplicationController.h' on the next line. Two blue arrows originate from the bottom edge of this box. The left arrow points down and to the left to a white rectangular box containing the text 'QtGui'. The right arrow points down and to the right to another white rectangular box containing the text 'QFtp'. This visualizes that 'UBApplicationController.h' is a base class or header file that defines interfaces or methods used by 'QtGui' and 'QFtp'.
